The development of this training program was a joint effort between the National Highway Traffic Safety Administration (NHTSA), International Association of Chiefs of Police (IACP), and the Transportation Safety Institute (TSI). It is designed to enable participants to develop the knowledge, skills, and attitudes necessary to effectively fill roles as instructors in support of the NHTSA/IACP DWI Detection and Standardized Field Sobriety Testing (SFST) training program which targets the detection of impaired drivers.

This course is designed to train instructors to effectively teach and provide effective feedback to learners. The curriculum is designed to be participant-centered and instructor-led. Each participant will be actively involved in the learning process. The course will provide all participants with a foundation in effective instruction principles, effective learning environments, promoting participation and interaction, and delivering effective feedback. The course teaches participants how to incorporate creative training techniques to deliver interactive presentations using techniques and/or materials that reinforce learning.
